	Start interview INTRO: Since it has been a couple of years since we interviewed you, I'd like to remind you about a few things. I am going to read you questions exactly as they are worded so that every respondent in the survey is answering the same questions. Take your time to think about your answers. There are no right or wrong answers and we are not passing judgment on anything you say. We want to get the most accurate answers you can give us. If at anytime during the interview you are not clear about what is wanted, be sure to ask me. When we are done with the interview, we will take a break before you do the skills tests. Remember, you are the expert on your own life and we want to learn from you. All information you give me will be anonymous, not connected to your name in any way. Any Questions?
